1. Course Description

1.1 Context

Course overview:

This is a course for graduate students who major in management or who aim for a career as a manager to have a deeper understanding of vital issues involved in being, becoming, confronting, and evaluating leaders in an organizational context.

Although the course offers practical leadership advice, it is in essence an intellectual pursuit of using theoretical frameworks to analyse leadership cases. Students who are not intrigued by this sort of exploration should not enroll.

This course employs a “case approach”. Some cases are formal business school cases, while some are more casual. Some are in written format, while some are movie episodes or in other formats. A typical class starts with a case discussion, and ends with “theories” and practical advice which the case leads to.

The classroom experience will be highly interactive. Students’ participation in discussions is a major part of the classroom experience and will be evaluated. Students will be divided into groups and have group assignments, which will be evaluated.

Prerequisites:
No.
1.2 Textbooks and Reading Materials

There is no single textbook for this course. For each lecture, reading materials will be assigned and posted at the website.

2.2 Course specific objectives

(1) To expose students to major leadership issues and prompt them to start thinking about them with an intellectual rigor;
(2) To familiarize them with main theoretical frameworks which they can use to explore the complexities of leadership issues;
(3) To learn how to analyse a case from different perspectives;
(4) To develop certain leadership skills which they can apply in their future work environment as well as in their school life;
(5) To stimulate students to reflect on their own life purposes, craft a vision, and embark on their own leadership journey.

2.3 Assessment/Grading Details

Grading with a total score of 100 points has four parts.

(1) Quizzes (45 points): Students are required to read the assigned readings before each class.
Starting from the second class, a quiz will be conducted at the beginning of each class. The content of the quiz is from the readings for this class and the teaching of last class. In total, there will be 17 quizzes, and each is 3 points. We will only count 15 of the quizzes and ignore the two you don’t perform very well. If you miss a quiz, a make-up quiz will only be allowed if you miss it for medical reasons for which you have official proof.

(2) Participation in class discussions (15 points). Students are encouraged to participate in class discussions. When one student speaks up in one class, he or she will get 1 point. In the participation part, a student will get 1 point at most for one class and 15 points at most for the whole course.

(3) Group assignment (25 points): Students will be divided into groups and finish a group assignment: presentation of a case. The subject of the case will be assigned, and the group will do their own research on the subject, and present both the “story” and the “theory” of the case in class.

(4) Individual Essay (15 points): Students will submit an essay after the course to summarize the leadership lessons they have learned during their team leadership experience as a team leader or member. The essay is at least 1000-English-word long, but no longer than 1500. The essay must arrive by email by 5pm, 3 July.

2.4 Academic Honesty and Plagiarism

It is important for a student’s effort and credit to be recognized through class assessment. Credits earned for a student work due to efforts done by others are clearly unfair. Deliberate dishonesty is considered academic misconducts, which include plagiarism; cheating on assignments or examinations; engaging in unauthorized collaboration on academic work; taking, acquiring, or using test materials without faculty permission; submitting false or incomplete records of academic achievement; acting alone or in cooperation with another to falsify records or to obtain dishonestly grades, honors, awards, or professional endorsement; or altering, forging, or misusing a University academic record; or fabricating or falsifying of data, research procedures, or data analysis.

All assessments are subject to academic misconduct check. Misconduct check may include reproducing the assessment, providing a copy to another member of faculty, and/or communicate a copy of this assignment to the PHBS Discipline Committee. A suspected plagiarized document/assignment submitted to a plagiarism checking service may be kept in its database for future reference purpose.

Where violation is suspected, penalties will be implemented. The penalties for academic misconduct may include: deduction of honour points, a mark of zero on the assessment, a fail grade for the whole course, and reference of the matter to the Peking University Registrar.

For more information of plagiarism, please refer to PHBS Student Handbook.
